# 1 Introduction

Keep this short in order to avoid people falling asleep here. Emphasize the importance of this book tho..

People asking questions covered in this book shall be nominated for the lava-bucket-challenge...

## 1.1 Recent changes

The following list gives an overview of the latest changes to the admin handbook for your convenience:

- Serverrules (Rule 4) updated (4.1)

## 2 Expectations

The server is supposed to be a place where people can have fun and it is the duty of its admins to ensure this. If any situation on the server is not covered in this book it is expected from you that you act reasonably.

### 2.1 General behavior guideline

(there has to be a better title...) A clan-member is expected to act in a mature and professional manner at all times. Respect the people on the server and the people will respect you. Besides the loss of respect you might also face further consequences if you:

- Abuse your powers
- Insult players
- Makes racist comments
- Violate the server-rules

Cheating will result in an immediate ban from the clan and the server.

### 2.2 Forum activity

We expect members to read the forums on a regular basis as important news will be made public there. And it is our main way to communicate. Admins that are level 60 and above also have forum duties which are covered in section 6.1.

## **3 Clan structure**

text...

### **3.1 Admin hierarchy**

### **3.2 Conflicting admin opinions**

## 4 Server rules

General stuff...

### 4.1 S&D Server

#### Rule 1

##### **ABUSE: Excessive 3xFrag, Clays, RPG.**

Players should not be placing claymores at spawn. Period. No more than 2 claymores in any given spot, same goes for c4. Players should not be spamming spawn/rush points with 3x grenades. Finally, any player running around using a rocket as a primary, and suicide rocketing, should be warned. No exceptions.

Penalty: warning

B3 command: !w <playername> rule1

#### Rule 2

##### **CAMPING: No excessive camping!**

Camping can be defined as sitting in spawn on offense. On defense, sitting in 1 spot surrounded by claymores. Additionally, sitting in 1 spot for more than half the round, or every round is considered camping. If you find a player doing so, warn them, and act appropriately.

Penalty: warning

B3 command: !w <playername> rule2

#### Rule 3

##### **PLAY THE OBJECTIVE ON OFFENSE!**

If there are only one or two players remaining on offense and neither one of them attempts to reach the bomb/plant for about 30 seconds it can be considered as not playing the objective. If the player in question is under fired, pinned in a spot by

the enemies or can't reach the bomb for a different understandable reason this rule does not apply. The same goes for the defense if the bomb has been planted.

Penalty: warning

B3 command: !w <playername> rule3

## Rule 4

### RESPECT ADMINS AND PLAYERS!

Any player that is toxic, trolling, constantly causing trouble and being a nuisance should receive a warning. If an admin is being disrespectful, and the player retorts, it's your own doing. Don't dish it out if you can't take it. These players should not be warned if it's admin initiated. Constant racism towards players, and admins will also receive a warning. Continued disrespect will be continued warnings, until b3 kicks. If the player comes back and keeps being disrespectful, a temp ban will be issued, and senior admins will be contacted regarding the matter.

Penalty: warning, for severe cases a tempban for *up to* 5 days.

B3 command: !w <playername> rule4 or !tb <playername> 2d rule4

## Rule 5

### NO HACKING / GHOSTING

Any player suspected of hacking or ghosting will be in violation of NRU rules, and removed from the game. Please make sure that you comply with the admin protocol on bannings described in chapter 5.2.

If you suspect someone of cheating and want to communicate this to the other admins without informing the player in question about this, it's recommended to do a !list to obtain the players playernumber (in the example we will use player number 3) and then type in the chat: something like <3>< or **3** <>< or **3@**<><

Penalty: tempban for 2d or permaban (depending on admin level)

B3 command: !tb <playername> 2d rule5 or !pb <playername> rule5

## Rule 6

### ENGLISH ONLY!

This rule is pretty self explaining. However try to make sure the player is actually speaking in a different language and not slamming on a (possibly non-english) keyboard in rage.

Penalty: warning

B3 command: !w <playername> rule6

## **Additional rules**

### **Scripting / Scrolling**

Scripting or scrolling is not permitted on the server and will be strictly punished. The punishment depends on the behaviour of the player in question and is at admins discretion.

Penalty: warning, for severe cases a tempban for *up to* 5 days.

B3 command: !w <playername> ns or !tb <playername> 2d ns

## **4.2 TDM Server**

Currently we have the same set of rules on both servers. So there is nothing special to remember for the TDM server.

# 5 Admin protocol

text...

## 5.1 Warnings

## 5.2 Banning

To do so, I ask all admins, 20-100, to provide video proof, by using the record function. To do this, in console, type: /record to record the demo, and /stoprecord. Once the demo has been recorded, I ask, if possible, to upload the demo to youtube for easier viewing within the ban thread. If you are unsure how, there is an excellent thread created by NRU|Reeps, located here: [link...](#)

### **9.3 Troubleshooting**

#### **9.3.1 Warnings for admin impersonating**

If you get warned for admin impersonating please remove your tags and inform any level 100 admin. There is a bug in B3 that causes the admin level to be reset, so this is nothing to worry about.

#### **9.3.2 Warnings for not wearing a tag**

If you get warned for not wearing a tag please add the tag to your name. This usually happens after the bug described above is fixed by an admin or after you have been marked as a clanmember in the system for the first time.
